Response to Arguments

1. Applicant's arguments with respect to claims 30-35 have been considered but are moot in view of the new ground(s) of rejection.

Specification

2. A substitute specification is required pursuant to 37 CFR 1.125(a) because the length of the changes could cause mistakes during the process of entering the amendments.

A substitute specification filed under 37 CFR 1.125(a) must only contain subject matter from the original specification and any previously entered amendment under 37 CFR 1.121. If the substitute specification contains additional subject matter not of record, the substitute specification must be filed under 37 CFR 1.125(b) and must be accompanied by: 1) a statement that the substitute specification contains no new matter; and 2) a marked-up copy showing the amendments to be made via the substitute specification relative to the specification at the time the substitute specification is filed.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any

Art Unit: 2634

evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 30-35 are rejected under 35 U.S.C. 103(a) as being unpatentable over Farias et al (IDS filed on 01/05/01) in view of Fazel et al (5,218,622).

Regarding claims 30, 32, 33, 35, Farias et al discloses a transmission system comprising the following claimed limitations: "a first ECC encoder" (col. 10, lines 55-58), "a second ECC" (Fig. 2, block 118), "a modulator" (Fig. 2, 116, 122, 142, 129, 136, 141, 130), "a transmitter" (Fig. 2, 130), "the first data stream has data for demodulation for demodulating the modulated signals corresponding to the second data stream" (Fig. 10, block 206, 190).

Regarding claims 31, 32, 34, 35, Farias et al further teaches the following claimed limitations: "a demodulator" (Fig. 10, block 188, 190, 206), "first ECC decoder" (col. 10, lines 55-58), "second ECC decoder" (Fig. 10, block 195).

For the above claims, Farias et al does not specifically teach that "BCH" and "Reed Solomon" coding/decoding technique are used. Nonetheless, Farias et al does teach "any number of conventional signal constellations and modulation schemes can be used for either the main channel or the secondary channel" (col. 10, lines 64-67, 8-14). Further, using "BCH" and "Reed Solomon" coding/decoding for error correction purpose is well known in the art at the time of the invention (see Fazel et al, col. 9, lines 55-col. 10, line 2). Accordingly, it would have been obvious to one of ordinary skill in the art at the time of the invention to modify Farias et al's

Art Unit: 2634

error correction coding/decoding circuit using conventional ECC techniques. Such modification is a matter of choice to meet the design criteria of a particular application.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
